EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harold Fullmer (42,560) on 9/23/04.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 4, lines 14-15 have been changed to:

This problem is solved, for example, according to an embodiment of the invention by means of a piston that is provided with one peripheral web protruding from the peripheral surface, disposed on said peripheral surface in both areas, each of which defining one end of the piston, and supporting connector elements, which extend longitudinally in the direction of the other end of the piston, arranged successively at a distance from each other in a parallel manner contiguous to the peripheral webs. Each two adjacent supporting connector elements define a groove-shaped recess and are provided with a collar-shaped seal made of a thermoformable sealing material, which is formed on the piston body in such a way that the peripheral webs as well as the supporting connector elements are

incorporated into the material of the collar-shaped seal over only a portion of their height.

The above change to the specification has been made to remove a reference to "claim 1" in the specification.

IN THE CLAIMS:

In claim 1, line 5, "piston. Supporting" has been changed to --piston, and supporting--.

In claim 1, line 7, "are" has been deleted.

In claim 1, line 9, "web" has been changed to --webs--.

In claim 3, line 1, "claim 1 or 2" has been changed to --claim 1--.

In claim 5, line 1, "one of the claims 1 to 4" has been changed to --claim 4--.

In claim 6, line 1, "one of the claims 1 to 5" has been changed to --claim 2--.

In claim 7, line 1, "one of the claims 1 to 6" has been changed to --claim 6--.

The above changes to the claims have been made to correct claim format and more clearly claim the invention.

REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 6,591,948 to Cassellas et al. The improvement comprises a piston with supporting connector elements arranged contiguous to peripheral webs disposed on each end of the piston for the purposes of providing a sufficient sealing surface between the peripheral surfaces of the piston and the inner wall of the cylinder.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

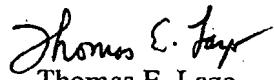

The patent to Cassellas et al. is cited for the showing of a piston similar to applicant's but lacking a second peripheral web arranged contiguous with the supporting connector elements.

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

An agreement was reached to remove claim references in the specification, correct claim format, and more clearly claim the invention.

Part III.

It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
